

# COVID-19

## Cancer and COVID-19 Vaccines

In most cases, get the COVID-19 vaccine as soon as it is offered to you.

### Do not get the vaccine if you:

-  are on rituximab treatment. Wait 3 months after your last dose.
-  are on maintenance rituximab. Talk to your hematologist.
-  are not sure when you will have a stem cell transplant. Talk to your hematologist.
-  have had a stem cell transplant in the past 6 months.
-  will have a stem cell transplant in the next 3 months.

**Keep following all public health measures after your vaccine.**
